## СОДЕРЖАНИЕ

1. Описание задания .....	3
2. Текст программы .....	4
3. Связь приложения с API по доменному имени .....	36
4. Результаты выполнения программы.....	38

# 1. Описание задания

На основе методических указаний разработайте мобильное приложение на языке Kotlin (платформа Android) или языке Swift (платформа iOS). Для создания приложения необходимо решить следующие задачи:

1. Создать стартовый проект мобильного приложения.
2. Добавить компонент таблицы в Ваше приложение.
3. Добавить подключение из мобильного приложения к веб-сервису, разработанному в лабораторной работе №6.
4. Наполнить таблицу элементами, полученными из вашего веб-сервиса: с помощью запросов к API получить из него данные.
5. Разработать дополнительный экран с UI компонентами для отображения детальной информации об элементе таблицы при касании по нему.

Дополнительное задание:

Реализовать возможности редактирования, добавления и удаления данных таблицы в мобильном приложении с помощью запросов к веб-сервису.

## 2. Текст программы

Конфиг HTTP reverse proxy (IIS) C:\inetpub\DZ-RIP\web.config

### 3. Связь приложения с API по доменному имени

Связь с API осуществляется по протоколу HTTPS на порт 443 (IP 91.77.163.54). В качестве SSL сертификата используется бесплатный от «freessl.org».

Алгоритм соединения:

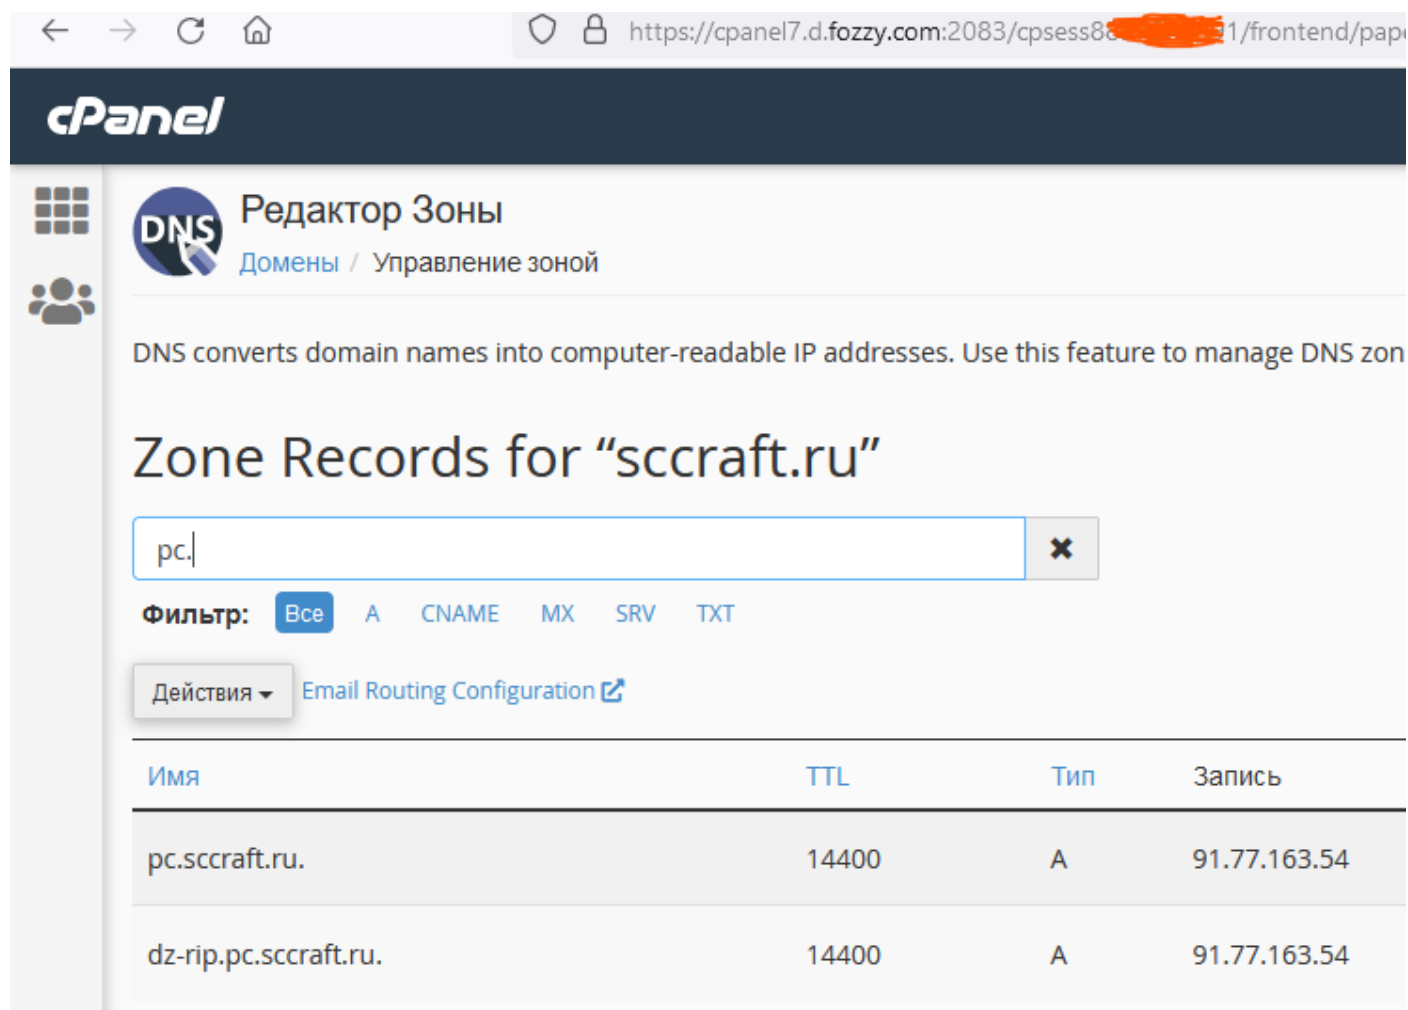

1. Приложение обращается по URL адресу API
2. Подключение обрабатывает IIS и перенаправляет запрос на адрес <http://127.0.0.1:8000>
3. IIS получает ответ от API и перенаправляет его приложению

Информация о домене

The screenshot shows the dnar.ru domain management interface. The top navigation bar includes a logo, a user status bar (Пользователь: [redacted], Ваш статус: Клиент, Доступно: 9 руб.), and a 'Домены' (Domains) section. Below this is a 'Инструменты' (Tools) section with icons for various actions like Redesigning, Renewal, Transfer Code, etc. The main content area displays the details for the domain 'SCCRAFT.RU'.

Домен SCCRAFT.RU	
Имя домена	SCCRAFT.RU
Тип	CORPORATE
Статус домена	DELEGATED
Дата регистрации	03-10-2015
Продлен до	03-10-2022
DNS-серверы	ns1.fozzy.com ns2.fozzy.com
Описание домена	
Дополнительная информация	
Идентификатор Администратора (nic-hdl)	[redacted]
ФИО по-русски	Карпов Игорь Евгеньевич
ФИО по-английски	[redacted]
E-mail Администратора	[redacted]
Автоматическое продление домена	Выключено
Парковка домена	Выключено
Идентификатор договора (-RMT-R01)	[redacted]
Дата последней смены Регистратора	[redacted]
Дата последней смены Администратора	[redacted]
Регистратор	R01-RU

«А» запись субдомена dz-rip.pc.sccraft.ru

The screenshot shows the cPanel interface for the DNS Zone Editor. The browser address bar displays `https://cpanel7.d.fozzy.com:2083/cpsess8.../frontend/pap...`. The page title is "Редактор Зоны" (Zone Editor) with a sub-header "Домены / Управление зоной" (Domains / Zone Management). A description states: "DNS converts domain names into computer-readable IP addresses. Use this feature to manage DNS zon...". The main heading is "Zone Records for 'sccraft.ru'". Below this is a search input field containing "pc." and a filter section with buttons for "Все" (All), "A", "CNAME", "MX", "SRV", and "TXT". A "Действия" (Actions) dropdown menu is visible, with a link to "Email Routing Configuration". The main content is a table of DNS records.

Имя	TTL	Тип	Запись
pc.sccraft.ru.	14400	A	91.77.163.54
dz-rip.pc.sccraft.ru.	14400	A	91.77.163.54

Особенности данной схемы:

1. Если прокси включён, но сервер API выключен, то клиент получит ошибку 502
2. Если сайт IIS, настроенный как прокси будет выключен, то IIS будет выдавать содержимое «Default Web Site», следовательно, в большинстве случаев при этом, клиент получит ошибку 404.

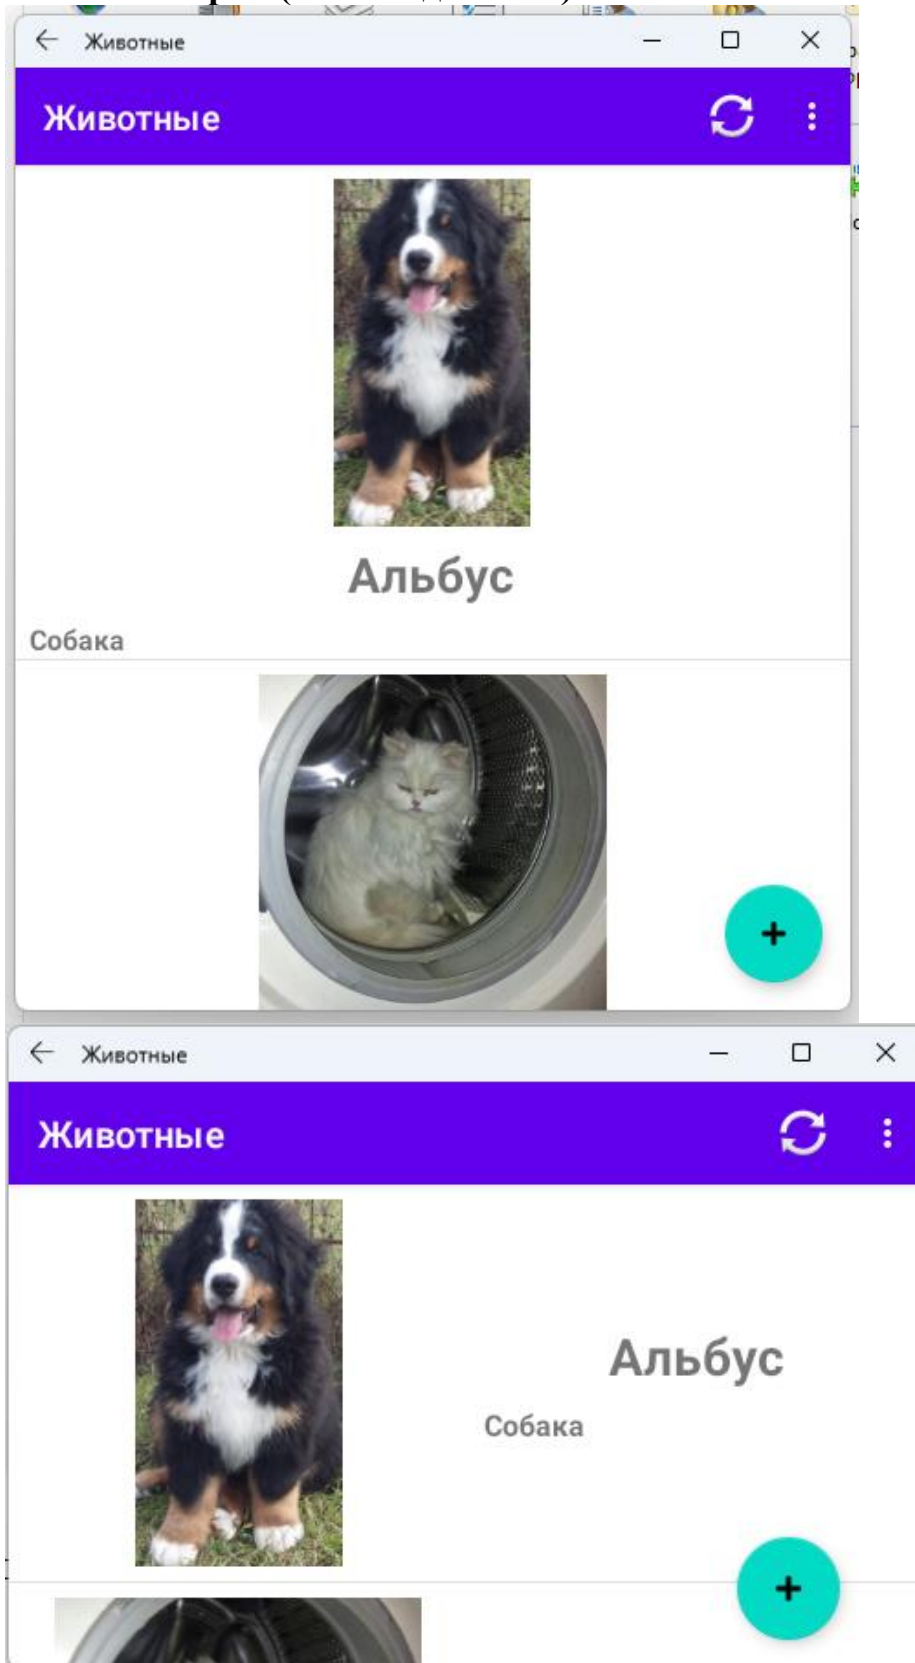

## 4. Результаты выполнения программы

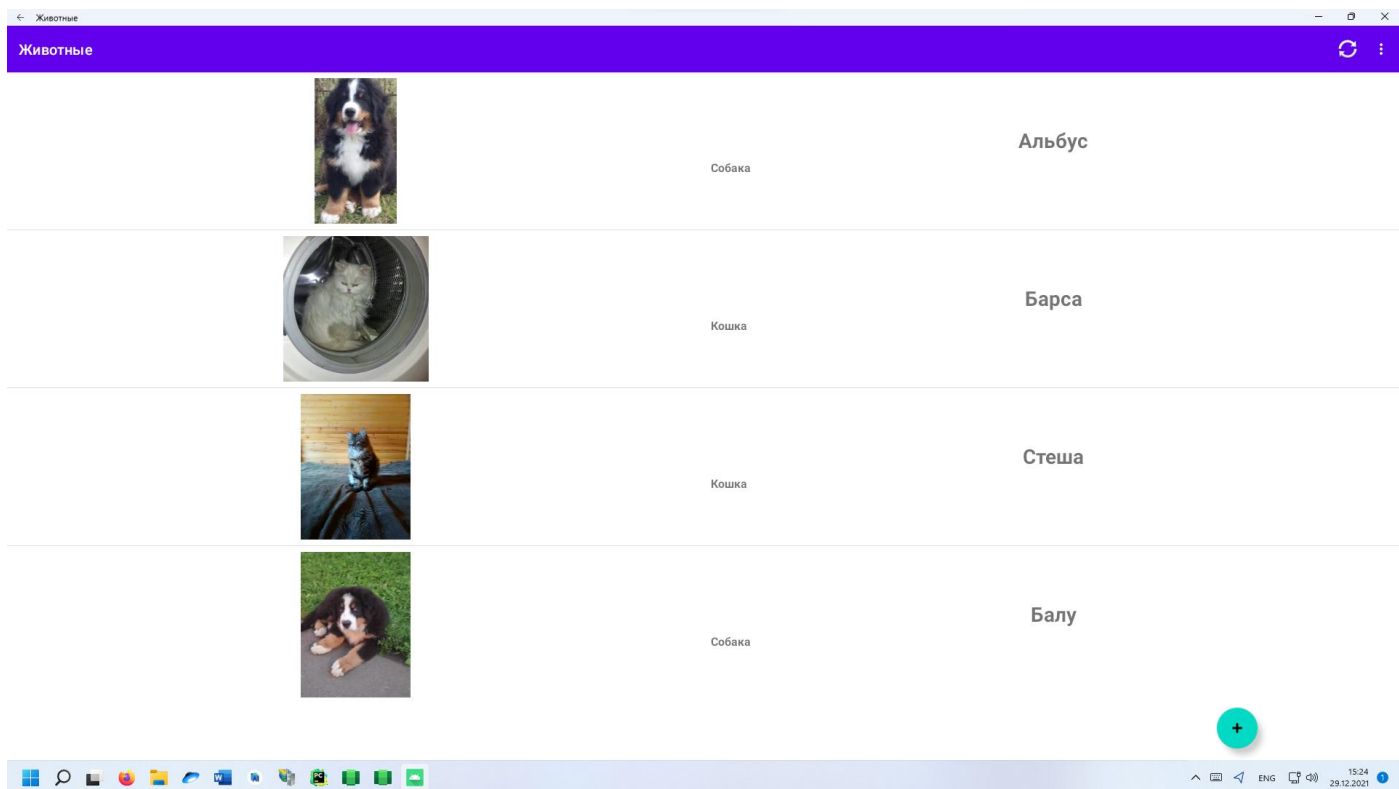

Программа тестировалась на следующих устройствах:

1. Windows 11 Subsystem for Android (только светлая тема)

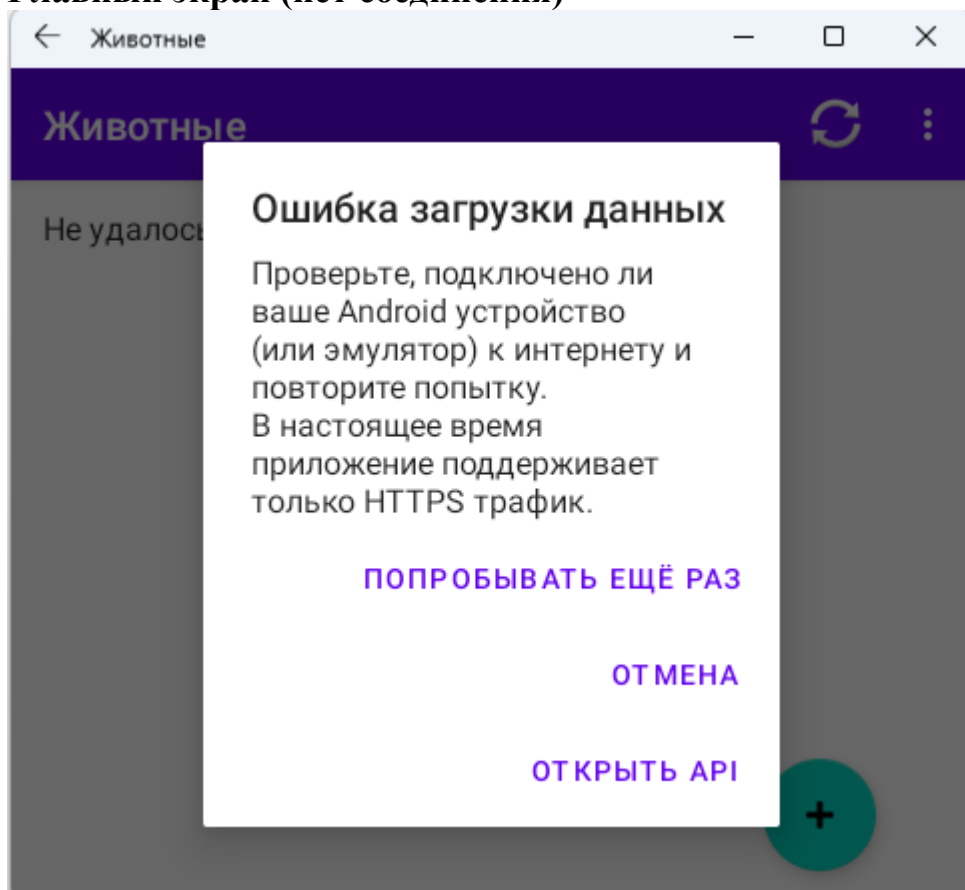

### Windows 11 Subsystem for Android

Главный экран (есть соединение)

## Главный экран (нет соединения)

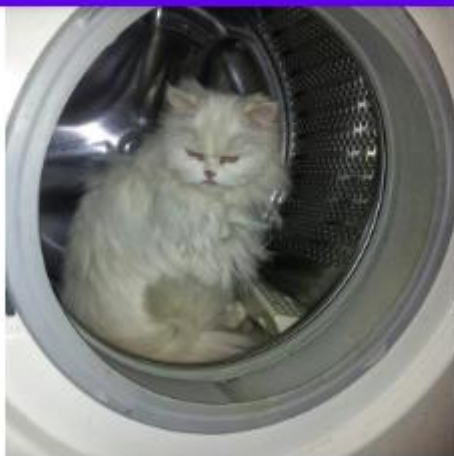

При нажатии кнопки «Попробовать ещё раз» будет выполнена повторная попытка.

Кнопка «Отмена закрывает диалог»

Кнопка «Открыть API» открывает сайт API (см. ЛР №6) в браузере.

## Информация о животном

## О программе

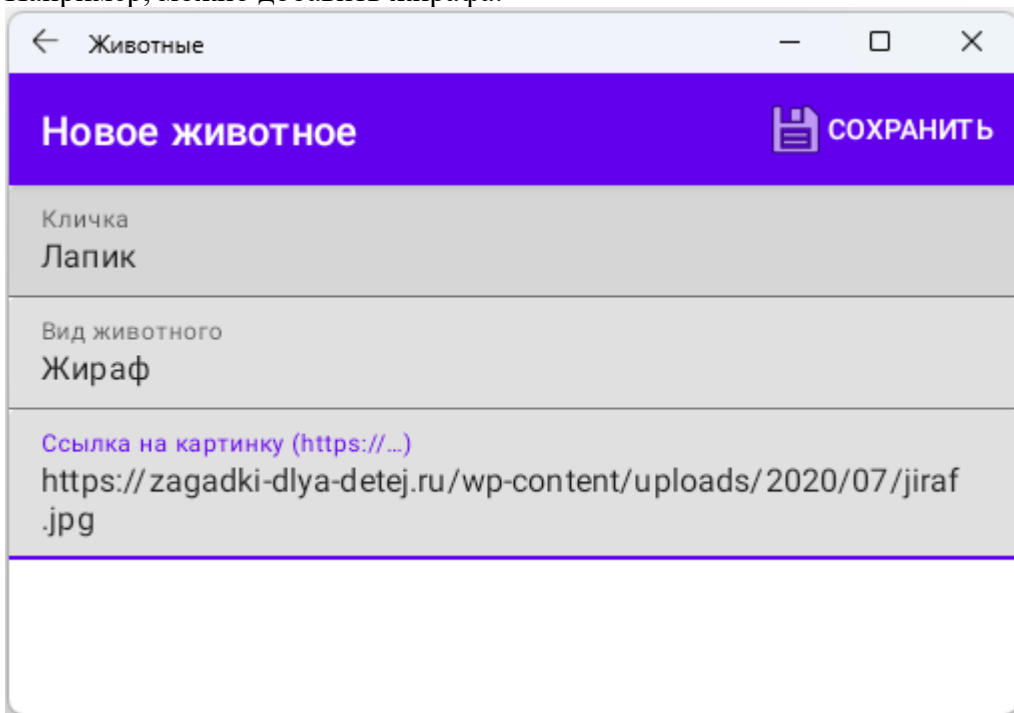

## Добавление животного (экран «Новое животное»)

Новое животное	СОХРАНИТЬ
Кличка	
Вид животного	
Ссылка на картинку (https://...)	

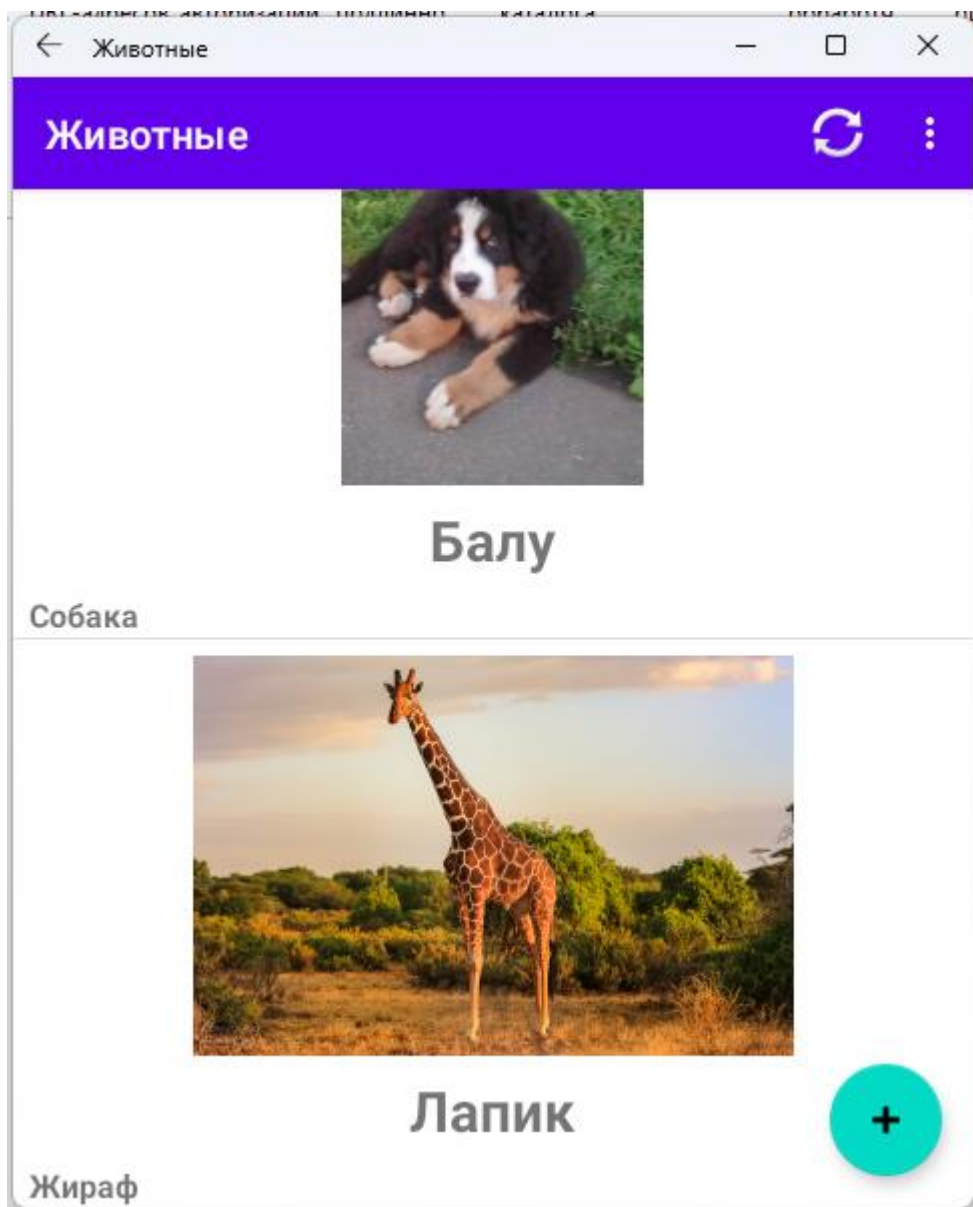

Данный экран позволяет добавить животное в приложение. Это изменение будет видно всем пользователям.

Например, можно добавить жирафа:

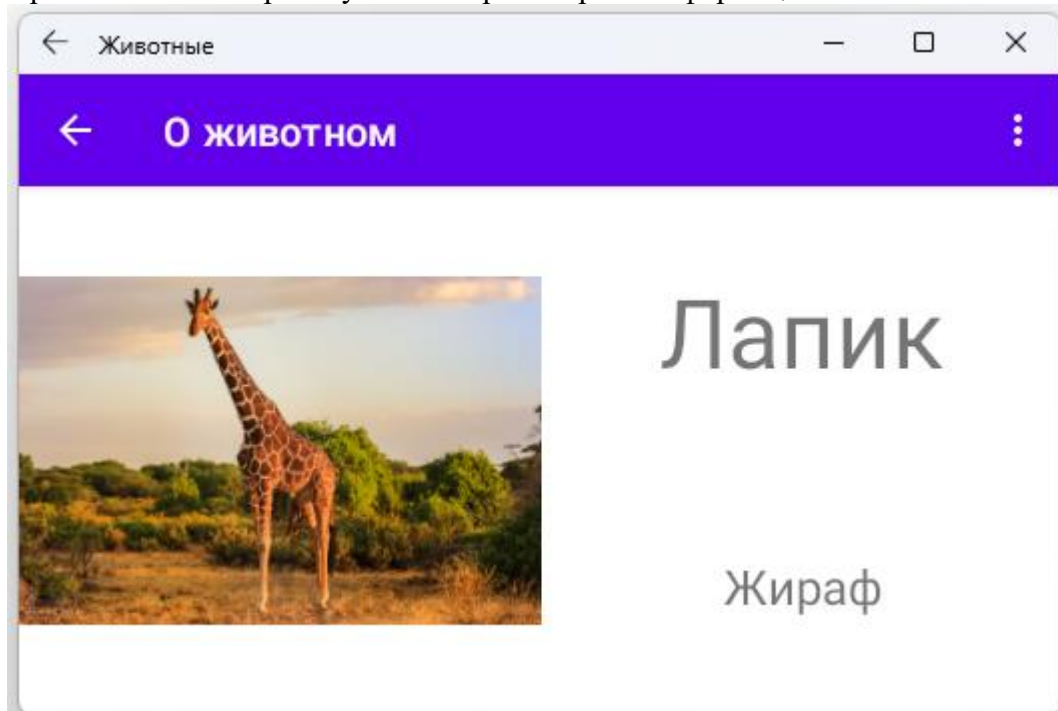

Новое животное	СОХРАНИТЬ
Кличка Лапик	
Вид животного Жираф	
Ссылка на картинку (https://...) <a href="https://zagadki-dlya-detej.ru/wp-content/uploads/2020/07/jiraf.jpg">https://zagadki-dlya-detej.ru/wp-content/uploads/2020/07/jiraf.jpg</a>	

После нажатия кнопки «Сохранить» новое животное появится в конце списка после его обновления

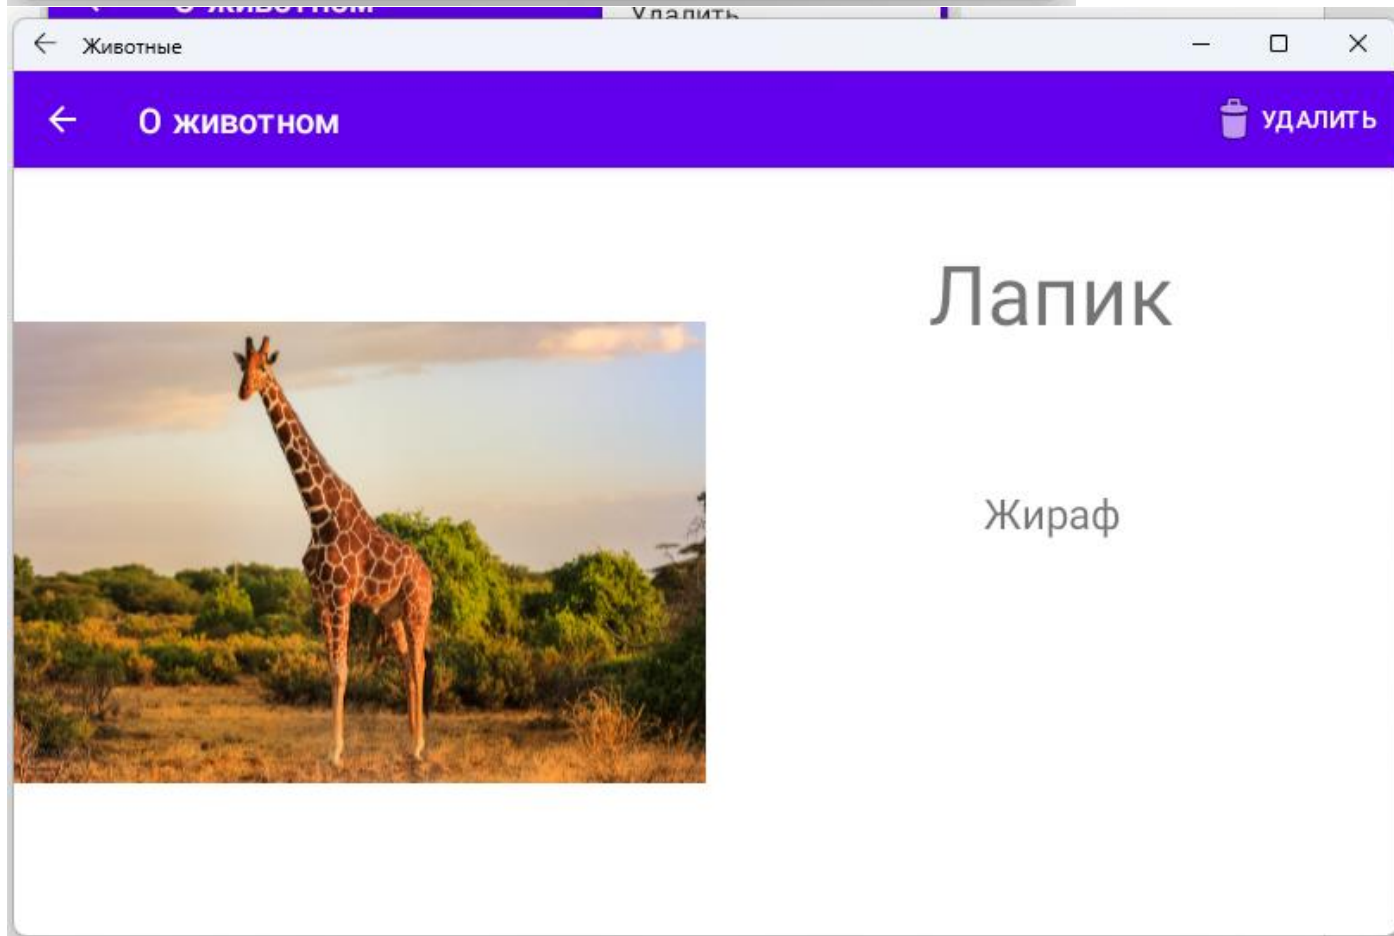

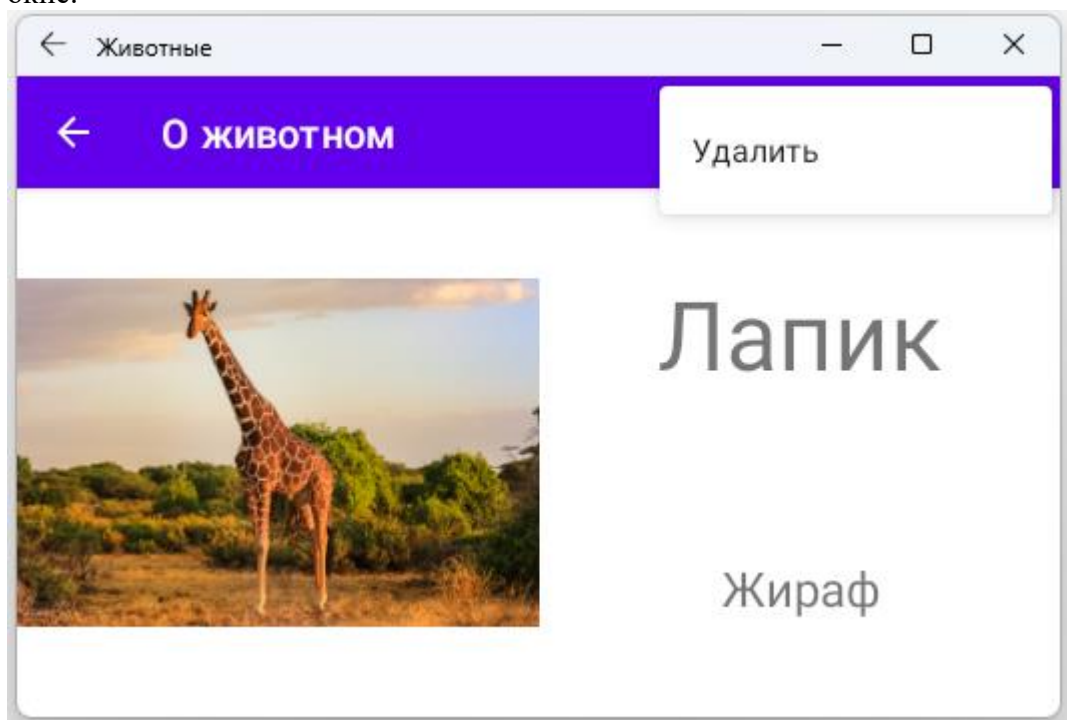

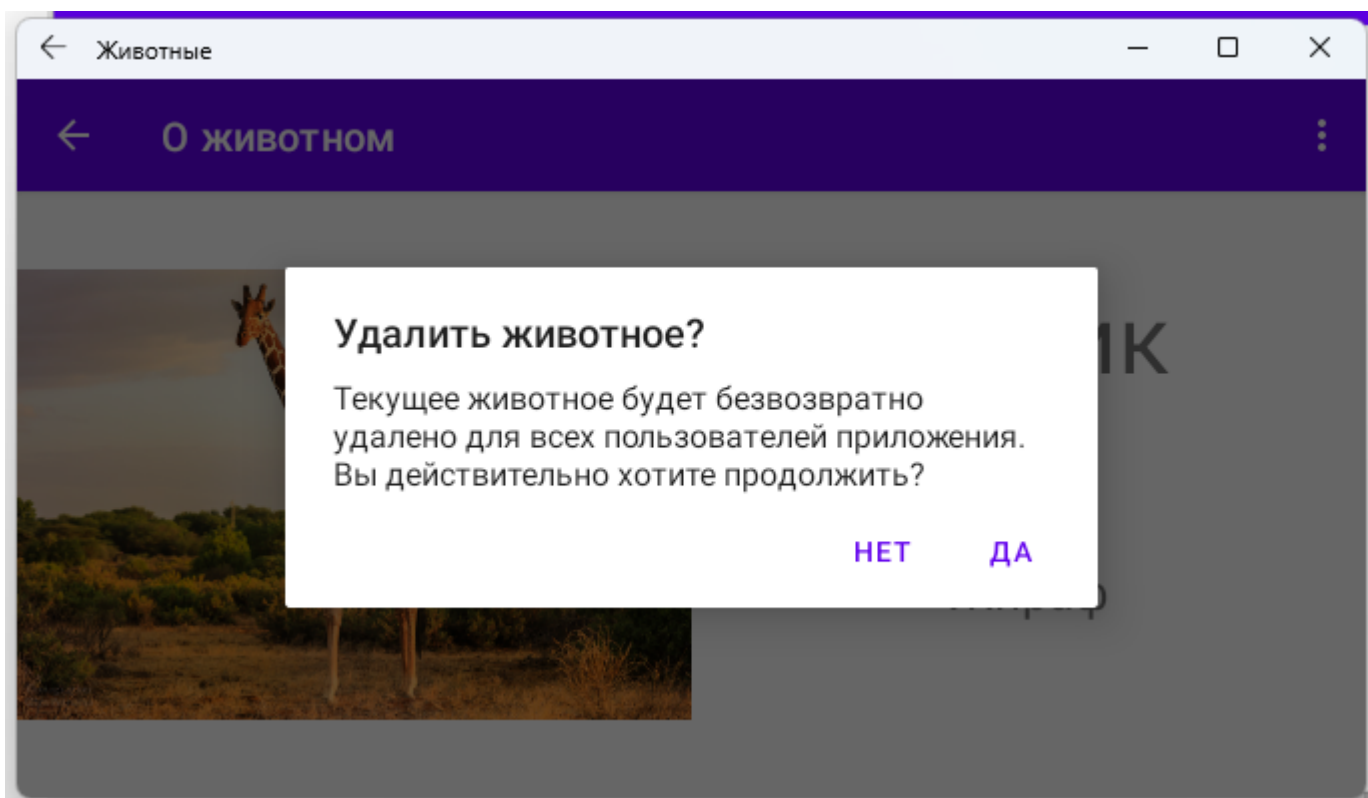

При нажатии на карточку можно просмотреть информацию о новом животном.

## Удаление животного

Для удаления животного нужно нажать на кнопку или пункт меню «Удалить» (зависит от размера экрана). После нажатия кнопки необходимо подтвердить своё согласие на удаление в диалоговом окне.

После нажатия кнопки «Да» животное удаляется из базы данных сервера.

Теперь рассмотрим работу приложения на реальном устройстве (описание скриншотов опущено, поскольку аналогично):

**Лог, сформированный приложением (отправлен через другое приложение «VK Почта»)**
